EDUCATION

Technocrats Institute of Technology

B.Tech in Information Technology

Pearl Public Convent School

Intermediate (+2) PCM

Bhopal, India

2021 - 2025

Malthone, India

2020 - 2021

WORK EXPERIENCE

Java Developer Intern

Anantixia LLP, Remote

Aug 2025 - Nov 2025

- Developed and tested 8+ RESTful APIs using Spring Boot handling CRUD operations and JSON-based data exchange.
- Implemented JUnit test cases achieving 85%+ code coverage reducing runtime defects during integration testing.
- Fixed 5+ backend bugs during Agile sprints improving API response stability.
- Optimized SQL queries improving data retrieval performance by around 20%.

TRAINING

Backend Engineering Training

Airtribe, Remote

Oct 2025 - Present

- Applied OOP, SOLID principles and design patterns in backend API development.
- Designed low-level components for scalable REST-based backend systems.

Full Stack Developer Trainee

QSpiders, Pune

May 2025 - Jul 2025

- Built practice projects using Java, JDBC and SQL.
- Implemented CRUD operations and relational database mappings.

PROJECTS

- **Doctor Appointment Booking System** — Spring Boot, MySQL, JPA, REST API
- Developed 10+ RESTful APIs for patient registration, doctor management, and appointment scheduling.
- Integrated MySQL database using JPA and Hibernate ORM managing 4+ relational tables with proper entity relationships and foreign key constraints.
- Performed CRUD operations for managing patient records, doctor details, and appointment data.
- Built server-side validation using `@Valid` annotations and configured centralized exception handling using `@ControllerAdvice`.
- Utilized `ResponseEntity` to return standardized HTTP status codes such as 200, 201, 400, and 404 for consistent API responses.
- Tested REST APIs using Postman to verify request handling and response accuracy.

TECHNICAL SKILLS

Programming: Java, C++, OOP, Data Structures & Algorithms(DSA)

Backend: Spring Boot, Hibernate, RESTful APIs, SQL

AI Fundamentals: Machine Learning, NLP, Generative AI

Design: System Design, Low-Level Design (LLD), High-Level Design (HLD)

Tools: JUnit, Postman, Git, GitHub, Maven, Docker

Soft Skills: Teamwork, Communication

CERTIFICATES

- HackerRank Certification – Problem Solving
- HackerRank Certification – Database (SQL)
